

Topic and Group Selection Form			
Topic:	Chatbot – Final Project	Week No.	11-18
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

Group Information

Group Number	Student Name	Student ID	Role in Group	Contact Information
	Adelan, Jhanna Shammel	1122- 1109	Researcher, presenter	09654817895
	Almario, Cel Rick D.	0122 - 1123	Leader, developer, tester	09391400256
	Delos Santos, Gladys A.	1122 - 1357	Researcher, presenter	09550162193

Topic Selection

- **Topic Title:** ROTC Knowledge Chatbot
- **Topic Description:**
Provide a brief description of the topic, including the main focus and objectives of the project.

The **ROTC Knowledge Chatbot**, allows cadets to access essential training topics and lessons in a conversational, easy-to-understand format. Cadets can ask questions, receive summaries, or explore detailed lessons. This interactive platform provides quick access to key information, enhancing learning and supporting cadet development within the ROTC program.

Column	Description
Attribute	Key features or topics extracted from the input data.
Pattern	Predefined input or question structure to identify specific user queries.
Response	The system's output or reply corresponding to the identified pattern.
Correlation	The relationship or relevance between the attribute, pattern, and response.
